

GrowthXP

WIC

A comprehensive tool for monitoring growth, including prenatal weight gain

Automatically calculates percentiles for all entered data

Can be used state wide, with one shared database or across districts of any size

Gestational age correction and other settings makes the charts and data easy to interpret

Full range of growth charts

- WIC charts
- WHO charts
- Prenatal weight gain charts
- Premature charts
- Syndrome specific charts

GrowthXP WIC is designed with a strong focus on caring for children's growth and development. By integrating GrowthXP WIC in your center, the availability and accuracy of growth data recording will be improved, with increased efficiency and reduced errors.
